Installation

These scenarios are packaged in the same ".rwp" file. Install it through the Train Simulator 2012 package manager. These scenarios were created on the version 3.0 of the route. They will not work with previous route versions.

Remark

Because in some scenarios you will run between Torino Porta Nuova and Sangone through Torino Lingotto, which is not finished yet, some "Pick up passengers" orders were replaced with "Stop" orders. This will be fixed later, when the route will be upgraded.

Note also that the same problem is experienced on track 2 in Sangone station.

Thanks

I'd like to thank all route and rolling stock/reskin creators.

Thanks to:
